High Pressure Pump
Series HDP MC

Design criteria

Hammelmann high pressure pumps are built to operate at the continuous maximum duty stated in the performance parameters. Just compare the crankshaft speed, average plunger speed, plunger diameter and power rating.

High pressure pump
Weight: 11820 lbs

Features
- Power ratings up to 1500 HP
- Vertical 7 cylinder design
- Wide variety of complementary ancillaries

Quality and reliability
- Stainless steel pump head free of alternating stress
- Cross head piston bellows seal
- Choice of ‘application specific’ seal assemblies
- Solid ceramic or tungsten carbide plungers
- Choice of bronze or stainless steel suction chamber
- Crank section calculation by ‘Finite element method’ ensures long working life under continuous load
- Twin helical integral reduction gear with crankshaft supported by 4 bearings
- Pressurised oil lubrication system with oil cooler/filter
