

HAMMELMANN®

HAMMELMANN MASTERJET

VERSATILE AND EFFECTIVE

The rotor jet with patented HPS sealing technology

High work ergonomics

High energy efficiency

Versatile in use

Outstanding performance

Long service life

Flexible speeds

THE
MASTERJET

THE MASTERJET ROTOR JET - YOUR ADVANTAGES AT A GLANCE

Rotor jets convert the high effectiveness of round jet nozzles into area performance through rotating nozzle heads. Various nozzle configurations and adjustable speeds open up many possibilities for surface treatment. The lightweight and compact design also enables work in areas that are difficult to access.

HIGH WORK ERGONOMICS

Due to the very low weight (~1.0 kg), compact design and low-vibration operation.

GREAT ENERGY-EFFICIENCY

The optimum internal flow allows the pump's total performance to be used without loss of energy.

VERSATILE IN USE

Many configuration options guarantee optimal design for a wide variety of applications.

MANUAL SPEED CONTROL

Full control over the speed by simply sliding the protective cover. No tools required!

UNSURPASSED SERVICE LIFE

HPS (High Performance Sealing) is a patented sealing system for MASTERJET rotor jets that work with the highest operating pressures.

EASY MAINTENANCE

Service friendly design with few components.

MASTERJET
with 6 active nozzle inserts
Roughening concrete

AFFECT THE REMOVAL RESULT

The great advantages of the MASTERJET can be seen in the ability to adapt quickly to changing work situations as well as in the controlled influence on the removal results. From gentle cleaning to strong removal, everything is possible. In order to adapt the removal result to the job requirements, two different work steps can be followed, which can be carried out independently of one another.

Option 1: Hammelmann offers various nozzle holders with different configurations and designs. The rotor jet can then be equipped with 2 or 4, 3 or 6 or 5 nozzles, depending on the nozzle holder. **Option 2:** The rotational speed can be adjusted independently of the nozzle configuration simply by moving the outer sleeve (magnetic brake).

Example: Nozzle holder for 2 or 4 nozzle inserts

MASTERJET rotor jet
With 2 nozzle inserts

MASTERJET rotor jet
With 4 nozzle inserts

THE RIGHT NOZZLE CONFIGURATION

The different nozzle configuration of the MASTERJET allows the use of 2, 3, 4, 5 or 6 nozzle inserts. The MASTERJET rotor jet thus offers a wide range of possible uses and proves to be a unique all-rounder in practice. The following rule applies here: the more nozzles there are, the more the force is distributed over the surface being processed. The force acting on the surface is therefore less with a 6-jet application than with a 2-jet application. With just one MASTERJET, sensitive surfaces can be gently cleaned and concrete surfaces in need of renovation can be roughened and removed.

SIMPLY ADJUST THE SPEED BY HAND

The speed is set by simply moving the outer sleeve. A copper strip in the outer sleeve then overlaps a rotating magnet inside either completely (high braking effect 🛑), halfway (medium braking effect 🚦), or not at all (no braking effect 🏃). With this simple movement, the speed can be adjusted quickly and easily, regardless of the nozzle hub. The further the outer sleeve is pulled towards the nozzle hub, the slower the nozzle holder rotates and the more the surface is processed, as the water jets stay longer in one place.

ROHRREINIGUNG MIT DER MASTERJET PIPE

ROTOR JETS FOR PIPE CLEANING

For different pipe diameters and even the most severe contamination, Hammelmann offers a large selection of tried and tested rotor jets for pipes and pipe bundles.

- SUITABLE FOR USE WITH MECHANICALLY DRIVEN CLEANING DEVICES
- STAINLESS STEEL HOUSING
- BUILT-IN EDDY CURRENT BRAKE AND COOLING JACKET IN DUST-PROOF ENCLOSURE
- WEAR-RESISTANT ROTARY CONNECTION WITH LABYRINTH SEAL
- AXIAL NOZZLE ARRANGEMENT. A RADIAL NOZZLE ARRANGEMENT IS POSSIBLE SPECIALLY FOR PIPE CLEANING
- PROTECTIVE COVER AVAILABLE AS AN OPTION

PROVEN SEALING SYSTEM

The sealing systems of our Masterjet Pipe variants are in no way inferior to those of the surface variants; the compacts are also available in two sealing system versions and offer impressive performance and service life. The Compacts are larger than Turbojet nozzles, but much smaller than the Masterjet Pipes, and are also kept at the perfect rotation speed by an eddy current brake.

OUR SMALL MASTERJET COMPACT VARIANTS

MASTERJET COMPACT

The light-weight yet powerful MASTERJET Compact converts the high effectiveness of round jet nozzles into area performance through rotating nozzle heads. The compact design also enables work in areas that are difficult to access. The patented HPS seal completes the system.

LOW WEIGHT

Das geringe Eigengewicht der MASTERJET Compact begünstigt das manuelle Arbeiten mit der Rotordüse.

COMPACT DESIGN

Thanks to its compact design, MASTERJET Compact can also be used in difficult-to-access environments.

- BUILT-IN EDDY CURRENT BRAKE
- WITH IMPACT PROTECTION
- NOZZLE INSERTS SUNK INTO THE NOZZLE HEAD
- LOW-WEAR ROTARY UNION

MASTERJET COMPACT IN COMPARISON:

Model	Weight	Length	Diameter	Flow rate	Operating pressure
MASTERJET COMPACT	~ 920 g	171 mm	39 mm	up to 30 l/min	up to 3200 bar
MASTERJET	~ 1400 g	174 mm	58 mm	up to 50 l/min	up to 3200 bar

MASTERJET COMPACT PIPE

Rotor jets convert the high effectiveness of round jet nozzles into area performance through rotating nozzle heads. Various nozzle configurations and adjustable speeds open up many possibilities for pipe cleaning. The lightweight and compact design also enables work in areas that are difficult to access.

MASTERJET Compact Pipe is the bridge between the MASTERJET Pipe for large pipes and the Turbojet nozzles for pipe bundles.

Various high-pressure nozzle holders give you the option of either only cleaning the inner walls of the pipes (1) or also removing blockages (2).

OUTSTANDING PERFORMANCE

Operating pressures up to 3200 bar.

VERSATILE IN USE

Various configuration options guarantee optimal set-up for a wide range of applications.

HIGH WORK ERGONOMICS

Due to the very low weight (~ 0.8 kg), compact design, and low-vibration operation.

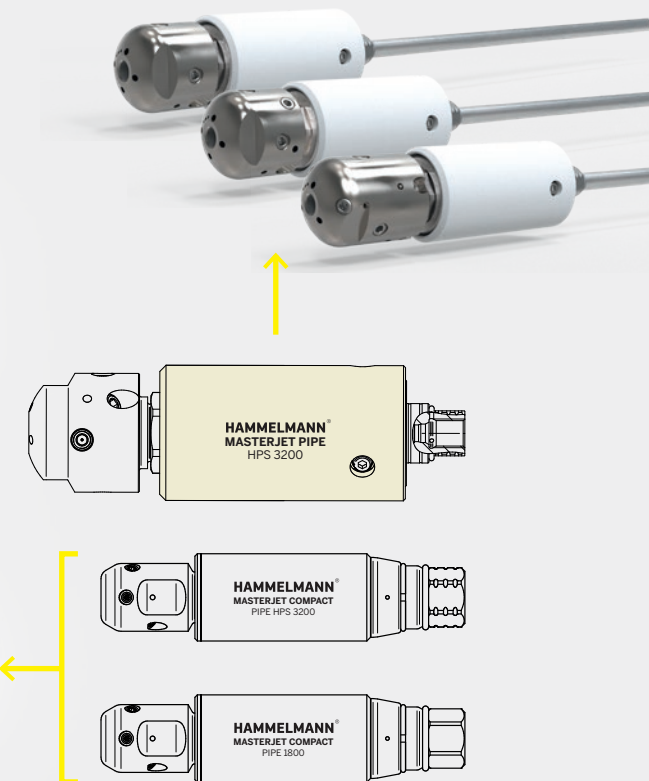

THE BEST OF BOTH WORLDS: STRONG, DURABLE AND COMPACT

The sealing systems of our smallest Masterjet variants are in no way inferior to those of the bigger builds; the Compacts are also available in two sealing system versions and offer impressive performance and service life. The Compacts are larger than Turbojet nozzles, but much smaller than the Masterjet Pipes, and are also kept at the perfect rotation speed by an eddy current brake.

MASTERJET COMPACT PIPE VS. MASTERJET PIPE FAMILY.

CAUTION: If recoil forces exceed 250 N, as from PC4, manual operation is no longer permitted!

SERVICE AND CONFIGURATION

MAINTENANCE AND CARE OF A MASTERJET ROTOR JET

Hammelmann products are subject to the highest quality standards and guarantee outstanding performance as on the first day, even after long, intensive use. A general rule is that regular maintenance and care helps to extend the service life of the product and guarantee operational safety.

In our MASTERJET service video you will find useful tips on maintaining the rotor jet, on assembling, installing and removing various parts and on the professional replacement of wear components.

SLEDGE FOR ROTOT JETS

With the help of the sledge, rotor jets with extension lances are drawn centrally into the tubes to be cleaned. Thanks to the infinitely adjustable scissor arms of the spreading device, pipes with a diameter of 450 - 1400 mm can be cleaned; a conversion kit for \varnothing 250 - 400 mm is also available as an option.

TYPICAL APPLICATIONS
AND AREAS OF USE

EFFICIENT RENOVATION AND MAINTENANCE OF CONCRETE WITH THE MASTERJET

- THOROUGH AND QUICK CLEANING OF SMALL AND LARGE CONCRETE SURFACES
- ROUGHEN CONCRETE SURFACES FROM FINE TO COARSE
- REMOVAL OF INDIVIDUAL LAYERS OF CONCRETE
- COMPLETE SYSTEMS, DESIGNED FOR MAXIMUM FLEXIBILITY AND MOBILITY
- RENOVATE, MAINTAIN, REMOVE, PREPARE

THOROUGH AND QUICK CLEANING OF SMALL AND LARGE CONCRETE SURFACES

Sometimes it can be enough to thoroughly clean concrete surfaces in the course of a renovation if they are neither damaged nor weathered. We have developed product solutions to treat both small and large areas thoroughly and safely. The product range extends from hand-held high-pressure blasting guns to ergonomic work aids and high-pressure surface cleaners.

ROUGHEN CONCRETE SURFACES - FROM FINE TO COARSE

A high-pressure blasting gun can be used in combination with a rotor jet for roughening different concrete surfaces. Equip your MASTERJET with 2, 3, 4, 5 or 6 inserts and decide the degree of roughening yourself. The amount of water is evenly distributed over the number of nozzle inserts. With 6 inserts, the individual jet exerts significantly less force on the target surface than with 2 nozzle inserts. According to this rule, you can decide for yourself how you want to roughen the surface.

Effective graffiti removal

Thorough but **gentle** treatment without damaging the base material

Available as a hot water version

DECOATING AND STRIPPING

Effective removal of paint layers of various qualities with high-pressure water has become more and more established over time, as it is an extremely gentle yet thorough process that does not damage the base material. This work can be mastered excellently with MASTERJET rotor jets. The pressure and the removal rate can be easily and quickly adapted to the hardness and nature of the coating (see page 6). Thanks to the adjustable working pressure, water is completely sufficient as a medium without the need of adding abrasives. In connection with high-pressure pumps from Hammelmann you get an unbeatable system!

Hammelmann Test Area

TREAT A WIDE VARIETY OF SURFACES GENTLY AND THOROUGHLY

Cleaning surfaces of all kinds gently and thoroughly is one of the regular tasks in a wide variety of industries. The removal of dirt, residues and deposits with high-pressure water offers many advantages. The process low impact on the surfaces and is environmentally sound, and cleaning with high-pressure water in combination with our manually operated rotor jets offers more application options than almost any other system.

- ENVIRONMENTALLY FRIENDLY CLEANING WITHOUT CHEMICAL ADDITIVES OR CLEANING AGENTS
- FROM HEAVY CLEANING TO STRIPPING AND ROUGHENING
- A HIGHLY FLEXIBLE AND ADAPTABLE SYSTEM, EVEN FOR PLACES THAT ARE DIFFICULT TO ACCESS
- CLEANING OF ALL TYPES OF SURFACES, FLANGES AND SMALL PARTS, COLUMNS AND GRATING AS WELL AS GRAFFITI REMOVAL
- ERGONOMIC WORK AIDS AVAILABLE

Thorough cleaning of various surfaces

A SMALL LEVER WITH A GREAT EFFECT

A simple lever mechanism makes the trigger of our blasting guns child's play to operate. The operator can use the gun without feeling strain and physical stress which enables longer, more concentrated working periods.

SHOULDER STOCK - CAN BE ADJUSTED TO INDIVIDUAL REQUIREMENTS

ERGONOMICS

An ergonomically formed handle and various extensions can be easily combined. Each operator can find the working posture that best suits him, saving him effort and increasing workplace health and safety.

CONTINUOUS FLOW CHANNEL (BACKWARDS)

JETBOY WORK AIDS FOR SUPPORT IN ALL POSITIONS

The ergonomic work tools of the JETBOY series offer fatigue-free water jetting for a wide variety of working positions.

JETBOY L

JETBOY S

JETBOY XL

Hammelmann Test Area

JETBOY S

JETBOY S is an ergonomic water tool with an adjustable handle and a variable working height for a secure standing position when working overhead.

JETBOY L

You can adapt the JETBOY L to a wide range of different work positions. For cleaning ceilings, floors, and corners.

JETBOY XL

JETBOY XL allows virtually effortless work. This results in a significantly greater area performance.

JETMATE FREE-HANGING WORKING TOOLS FOR SURFACE PREPARATION

JETMATES are ergonomic, free-floating work aids that absorb recoil forces from all directions. They enable safe and body-friendly work.

JETMATE with MASTERJET

MASTERJET FLANGE CLEANER FOR USE WITH ROTOR JETS

Our flange cleaner makes work safety and quality when cleaning flanges a simple and quickly repeatable task.

CONFIGURING THE MASTERJET IN THE HAMMELMANN APP

An app was developed specifically for the Masterjet that allows you to configure your Masterjet virtually, try out scenarios and check them for function and safety.

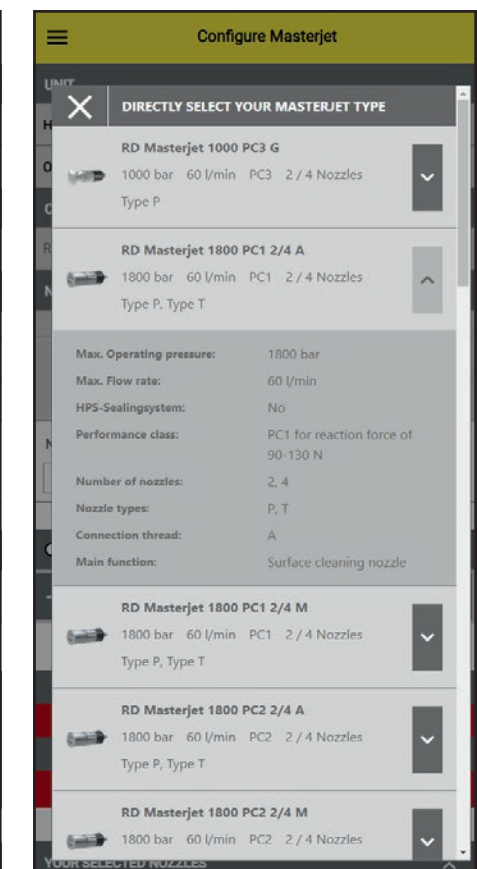

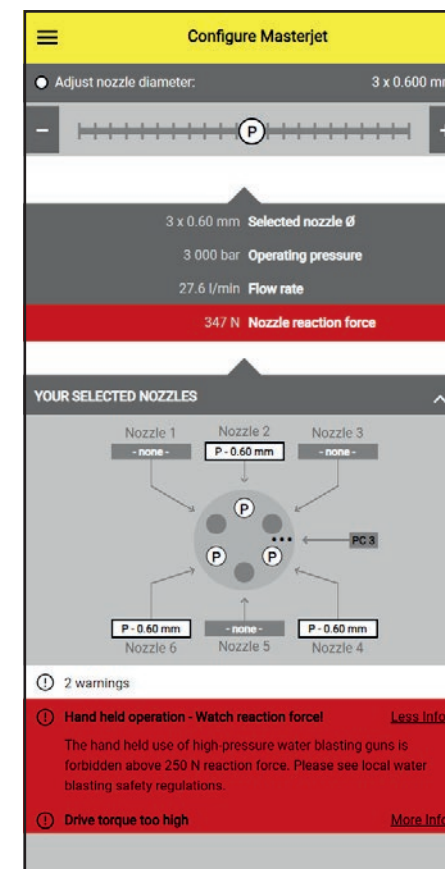

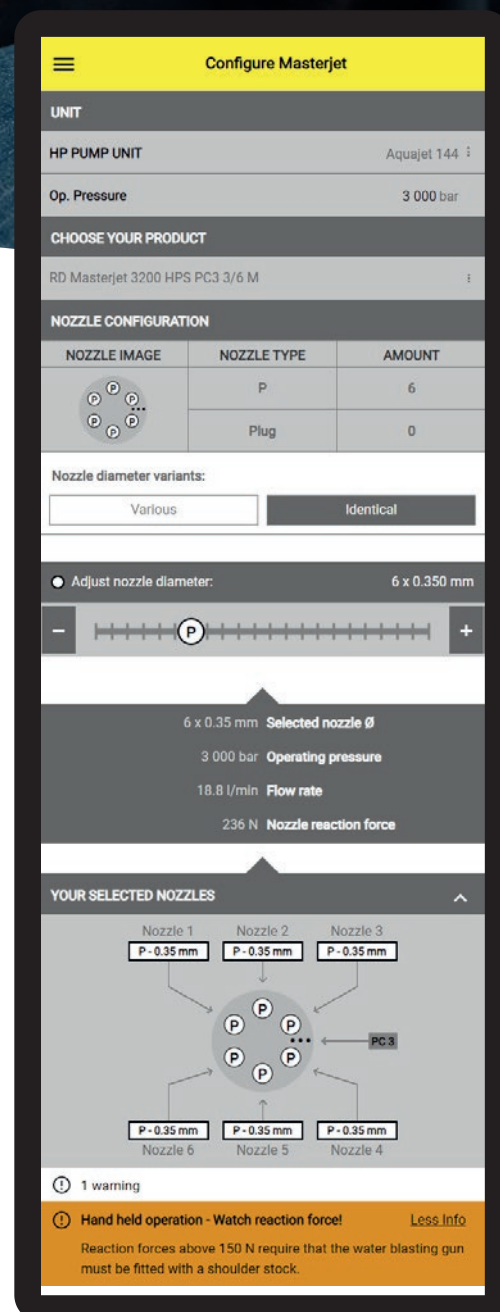

The Hammelmann Water Jetting Calculator (WJC) is also a free calculation app for water jet applications. This calculation app allows you to evaluate a high-pressure system from the high-pressure pump to the suitable nozzle insert, taking into account all parameters for the safe and targeted design of your configuration.

Calculation app for rotor jets

Free as an app for iOS, Android and your browser

Water Jetting Calculator: hammelmann.com/app

CLEAR INSTRUCTIONS

The WJC is not just a calculation app. What makes the app unique is the evaluation of the entered parameters.

Not only will it show you what problems are occurring during configuration, it will also explain why it is a problem and what to do.

You get everything clearly presented. Critical parameters are color coded.

FIND YOUR MASTERJET

Maybe you already know which Masterjet you want to configure, then you can select it directly. If you don't know yet or want to test a new configuration, the product finder offers the opportunity to easily simulate your application and find the perfect Masterjet.

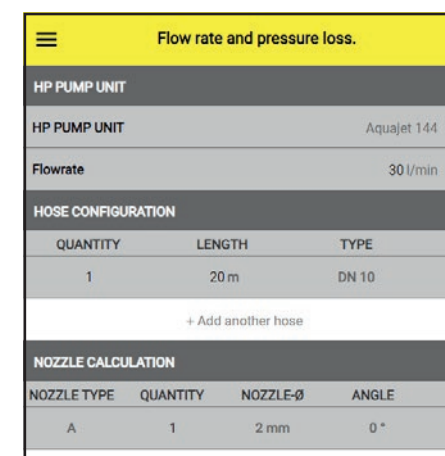

The app currently supports Masterjets for surface cleaning.

LEARN MORE

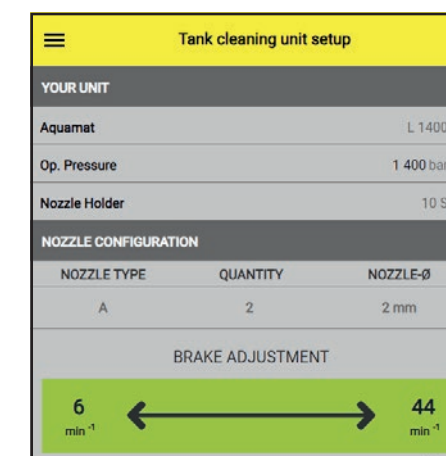

Detailed product views and performance parameters give you an overview of the Masterjet product line and helps you choose the best fit for your application.

You can click on the rotor jets directly from this view and use them for your calculation. If you are unsure, you can further customize your Masterjet once it is selected.

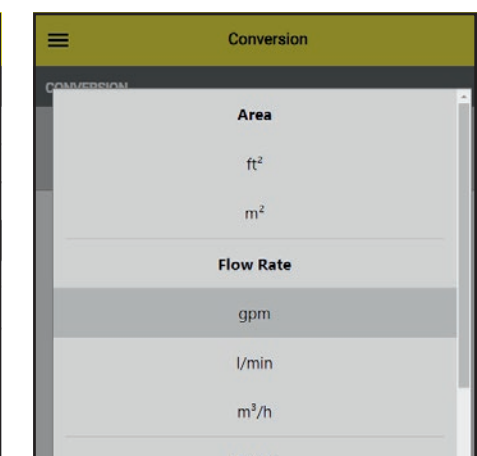

ADDITIONAL FUNCTIONS:

Configure a water jet system from the pump unit to the hoses to the nozzle.

Configure your Aquamat tank cleaning unit and set the nozzle holders and inserts correctly.

All required units can be converted using the integrated converter.

HAMMELMANN - DISCOVER THE MARKET LEADER

Hammelmann has been a successful manufacturer of high-pressure systems for over 70 years, which are used for cleaning and cutting purposes as well as in production processes. With over 500 employees in the Hammelmann Group, in Oelde and the subsidiaries in the USA, Australia, Spain, China, France and Switzerland as well as 40 other agencies, we are a company that operates worldwide.

STATE-OF-THE-ART TECHNOLOGY CENTER

For you and for our own R&D we run extensive tests in our modern Technology Center to see how and where water jet technology can be used in an economical, beneficial and ecological way. This is where modern technology and our innovative spirit go hand in hand to test product developments, new ideas, and specific customer requests in a practical setting and to put them through their paces.

Product quality and customer satisfaction are most important to Hammelmann. For this reason, products are not only tested under ideal conditions and then sold, but put to the test under extreme conditions.

In order to simulate the toughest and most demanding conditions possible at your site, we have a number of tanks and containers, concrete and metal walls, pipes, lines and components that we prepare and then process accordingly. The extensive tests can be carried out indoors with the help of automated robots and systems, or outdoors.

If desired, simulations can also be developed in cooperation with you. Together we will examine possible solutions for your particular application and provide you with fully documented test protocols and reproducible results. We are looking forward to your challenge.
