SPIDERJET® M EDGE

The Spiderjet® M Edge is attached to the work surface with permanent magnets and, thanks to its small build, is ideal for cleaning particularly close to the edge of the coated area. The vacuum system immediately retrieves all waste water and removed solids and allows for further processing.

Working width: 14.72 inch  
Operation pressure: max. 43k psi  
Operation speed: 0 – 23 ft/min  
Flow rate: max. 13 gpm  
Weight: ~ 230 lbs

**Field of application**

The drive wheels placed directly behind the high-pressure water tool enable a particularly narrow construction with a large working width. This makes the Spiderjet® M Edge great for removing coating from intermediate surfaces or working around narrow contours and on edges.

Two vacuum systems are available for the Spiderjet® M Edge.
